Commoning Marginalized Ecological Memories for Open Sustainability

APRIL 2025
1ST NEWSLETTER

ABOUT CO-MEMO-S

The goal of the Co-Memo-S project is to develop a comprehensive training program for youth workers, which encourages them to bring young and old people together around the theme of sustainability, by means of uncovering and sharing local socio-ecological memories and knowledge.

OBJECTIVES

1) to become agents of socio-ecological transformation;
2) to facilitate intergenerational cooperation and solidarity; and
3) to foster communing practices.

EXPECTED RESULTS

A Handbook: Showcasing different perspectives and actions of various generations regarding climate change, considering the unique cultural, social, and political contexts of specific partner countries and good practices in intergenerational work, interactive exercises, and e-learning materials.
Educational Videos: Exploring various aspects of the current ecological crisis, highlighting diverse perspectives.
An E-learning Platform: Providing an innovative, accessible platform for youth workers to access and utilize the project resources.
A Virtual Archive: Collecting local socio-ecological memories to promote shared understanding and action.

FIRST STEPS IN THE FIRST SEMESTER

1st transnational partner meeting in Murcia: In November 2024, the international partnership met for the first time in order to discuss the initial steps of the project implementation.

2nd transnational partner meeting in Limassol: In April 2025, the partnership met in Cyprus with the aim of discussing the production process and activities carried out so far (development of the state-of-the-art essays with the e-study exercises, good practices and interactive practices and the initial steps of the educational videos creation) and deciding on the next steps and testing plans.

NEXT ACTIVITIES IN THE SECOND SEMESTER

After the second transnational partner meeting, we are working on the finalisation of the state-of-the-art essays with the e-study exercises, good practices and interactive practices.

Moreover, we began working on the educational videos. The topics of the educational videos will be:

1. Climate change
2. Water pollution – water problems, droughts
3. Air pollution
4. Greenhouse gas emission
5. Ecosystem exploitation

And last but not least, we will finalise the structure of our LMS.
